Introduction

This user guide describes how the hematological and steroidal passports are implemented in ADAMS. It provides the necessary steps to manage an ABP: Athlete Biological Passport program in line with WADA ABP Operating Guidelines and related Technical Documents. The definitions below are specific to the ABP module in ADAMS. Refer to the International Standard for Testing and Investigation (IST) for the anti-doping definition:

- Athlete Biological Passport program
- Passport Custodian
- APMU - Athlete Passport Management Unit
- ABP Expert
