

Import of Analytical Results (XML and CSV)

The purpose of this specification is to describe the initial file format that will be used to electronically transfer analytical findings from WADA-accredited laboratories to the ADAMS system.

The file transfer format described in this document is meant to specify the minimum amount of information that must be provided by a lab to automatically post results against an anti-doping test recorded in ADAMS.

- File Format
- Timing of Submission
- Posting and Acknowledgement of Results
- Error Handling
- Analytical Result Data Elements
